

Claes Richárd, October 2022

### Leading the Way

### We are a company of firsts.

- The world's first electronic stock market.
- The first exchange to support Silicon Valley innovators.
- The first exchange to sell its technology to power exchanges around the world.
- The first major U.S. stock exchange to have a female President and CEO.
- The first exchange to adopt a board diversity rule.
- The first market operator to move its infrastructure to the Cloud.
- The first exchange to open the market in the Metaverse.

At Nasdaq, we don't see the world for what it is, we see it for what it could be. We disrupt. We innovate and We Lead.

# Mission Critical

We deliver world-leading solutions that improve the liquidity, transparency, and integrity of the global economy.

#### Market Platforms

We are advancing the modernization of markets to create more sustainable, inclusive and trusted financial networks.

- We operate 30+ exchanges for stocks, bonds, options & derivatives in North America and the Nordics
- We develop and deliver technology on which 130+ other global markets are based, including financial instruments, real estate and carbon removal.
- Introducing two new growth areas: Digital Assets and Carbon Markets.

#### **Capital Access Platforms**

We fuel economic growth through transparency and access to capital. We help our clients navigate the capital markets, accelerate their sustainability goals and drive governance excellence.

- We identify unique insights to help all investors grow and preserve wealth.
- We design governance solutions that enable companies to thrive in the public markets.
- We create more equitable opportunities to raising and accessing capital.

#### **Anti-Financial Crime**

We help protect the integrity of the financial system and root out financial crime, combatting an ever-increasing threat to the integrity of the global financial system.

- We identify and prevent fraud and money laundering, including drug money and human trafficking.
- We offer market and trade surveillance software, which detects and prevents financial fraud and theft.
